PERAKA DOLA NAGA SYAM KUMAR

Software Development Engineer In Test - II

pdnsyamkumar@gmail.com | +91-9014117617 | LinkedIn | Portfolio

SUMMARY

Software Development Engineer in Test with 3.5+ years of experience building Playwright/TypeScript automation frameworks for web and API services, with a good understanding of HTML, CSS, and DOM for reliable UI automation. Delivered a modular framework that cut regression cycle time by 40% and tripled test execution speed through parallelization. Achieved 85% test coverage while reducing defect resolution time by 30% via CI/CD-integrated API validation, and transformed flaky tests into reliable suites for on-schedule releases.

SKILLS

Test Automation & Frameworks: Playwright, Test Automation Architecture, Page Object Model (POM), Data-Driven Testing, Test Orchestration, Parallel Execution, Flaky Test Reduction
API & Functional Testing: REST & GraphQL API Testing, API Contract Validation, Functional Testing, Regression Testing, Manual Testing, Load Testing
Programming & Scripting: JavaScript, TypeScript, HTML, CSS, DOM, SQL, YAML, SOQL
DevOps & Tools: GitHub Actions, Git, VS Code, Postman, CI/CD Integration, Azure DevOps
QA Methodologies: Test Design & Execution, Test Documentation, Requirement Traceability, Risk-Based Testing, Shift-Left Testing, Smoke Testing, Defect Triage, Agile/Scrum, STLC, SDLC
Test Management: JIRA, TestRail, ProofHub
AI / Productivity Tools: ChatGPT, Claude, Codex, Cursor, Antigravity
Domain Tools: Salesforce, Tizen Studio, WebOS Simulators, ArcGIS, QGIS, Cartopia, FusionX

WORK EXPERIENCE

SDET-II | *KnackLabs | Client: Flipspaces* *Apr 2026 – Present*

- Architected a modular Playwright/TypeScript framework with ProofHub-linked test cases, delivering parallel execution that cut regression cycle time by 40%.
- Directed test orchestration with CI/CD pipelines, implementing shift-left flaky test reduction that automated regression suites and lowered release blockers by 25%.
- Defined risk-based test strategy and smoke test suites, documenting design standards and aligning execution with Agile sprint goals.
- Collaborated with engineering and product teams to map defects to ProofHub requirements, enhancing observability and accelerating delivery through clear communication.

SDET-I | *KnackLabs | Clients: One Health Assist, Hoichoi TV, eGain, Celito Tech* *May 2025 – Mar 2026*

- Led dual-track manual and Playwright/TypeScript automation, achieving 85% test coverage while documenting functional test cases and applying risk-based selection to cut regression effort by 35%.
- Mentored a 4-member QA team on JIRA-driven defect triage and prioritization, reducing average resolution time by 30% via clear communication.
- Validated REST and GraphQL APIs for high-volume, multi-tenant systems, executing functional and regression API tests to ensure contract compliance and data integrity.
- Engineered reusable API fixtures and data-driven test generation, applying shift-left test design to reduce flakiness and validate Smart TV compatibility on Tizen and WebOS.
- Integrated Playwright test suites into Azure DevOps CI/CD pipelines, enabling automated execution on each pull request and reducing manual regression effort.
- Created SQL data setup scripts for test environments, ensuring consistent test data across parallel executions.

Associate Quality Assurance Engineer | *KnackLabs | Clients: Calibrate, Ardelyx, TVS Motors, Betagged* *Mar 2023 – Apr 2024*

- Executed Salesforce integration testing with 500+ SOQL queries, documenting results in JIRA and maintaining 99.9% data integrity for an iOS application.
- Led end-to-end QA for a WatchOS EV control app, performing manual functional, regression, and smoke tests to verify remote lock/unlock and real-time sync.
- Identified 150+ critical defects during platform revalidation, applying risk-based testing and documenting findings in JIRA to stabilize the live platform.
- Conducted manual, API (Postman), and load testing within CI/CD pipelines, executing tests to uncover performance bottlenecks across client platforms.

GIS Engineer | *RMSI Pvt Ltd | Tech Mahindra | Cyient Ltd* *Jul 2018 – Mar 2023*

- Developed geospatial solutions for autonomous vehicles (Apple Maps, Go Hunt, TomTom Maps), including HD lane mapping and 3D road network modeling using ArcGIS, QGIS, Cartopia, and FusionX.

Bio-Medical Service Engineer | *Prime Agencies* *Jan 2017 – May 2018*

- Installed, calibrated, and maintained diagnostic medical equipment in healthcare facilities; conducted preventive maintenance and staff training.

PROJECTS

@pdnsyamkumar/playwright-base *(Open-source Playwright utility library)*

- Engineered BaseTestData, a reusable test-data abstraction enabling consistent, data-driven testing across suites.
- Designed BaseApi abstraction layer to standardize API contract validation and eliminate workflow duplication.
- Improved developer productivity by cutting boilerplate up to 50%, accelerating framework adoption across projects.
- Enabled modular, maintainable automation architecture adopted by engineering teams for real-world enterprise use cases.

EDUCATION

Albedo School of Education, Kerala — Graduate Program in Electronics & Engineering | 2018 – 2021
Government Institute of Electronics, Secunderabad — Diploma in Industrial Electronics | 2013 – 2016
