PERAKA DOLA NAGA SYAM KUMAR

SDET-II | QA Automation Engineer | Playwright + TypeScript | Node.js | CI/CD | REST & GraphQL API

Hyderabad, Telangana, India | +91-9014117617 | pdnsyamkumar@gmail.com | LinkedIn | Portfolio | NPM

SUMMARY

Software Development Engineer in Test with 3.8+ years of relevant experience building Playwright/TypeScript automation frameworks for web and API services, with a good understanding of HTML, CSS, and DOM for reliable UI automation. Experienced in AI-Assisted Testing using SKILL.md-based Agent Skills and Generative AI tools to accelerate test automation development, improve reliability, and reduce repetitive engineering effort. Delivered a modular framework that cut regression cycle time by 40% and tripled test execution speed through parallelization. Achieved 85% test coverage while reducing defect resolution time by 30% via CI/CD-integrated API validation, and transformed flaky tests into reliable suites for on-schedule releases.

SKILLS

Test Automation: Playwright, Test Automation Architecture, Page Object Model (POM), Parallel Execution, Flaky Test Reduction
API & Performance: REST & GraphQL API Testing, API Contract Validation, OpenAPI, Swagger, Performance & Load Testing (k6), Functional Testing, Regression Testing, Manual Testing, Postman
Programming: JavaScript, TypeScript, HTML, CSS, DOM, SQL, YAML, SOQL
DevOps & Tools: Azure DevOps Pipelines, GitHub Actions, Git, CI/CD Integration, Allure Reporting, Linux
QA Methodologies: Risk-Based Testing, Shift-Left Testing, Smoke Testing, Defect Triage, Agile/Scrum, STLC/SDLC
Test Management: JIRA, TestRail, ProofHub
AI-Assisted & Generative AI: AI-Assisted Testing, SKILL.md-based Agent Skills, Generative AI Tools, Vibe Coding, ChatGPT, Claude, Codex, Cursor, Antigravity

PROFESSIONAL EXPERIENCE

SDET-II | *KnackLabs* — Apr 2026 - Present | Hyderabad

- Built a modular Playwright/TypeScript automation framework with ProofHub-linked test cases, delivering parallel execution that cut regression cycle time by 40%.
- Leveraged AI-Assisted Testing with SKILL.md-based Agent Skills and Generative AI tools to accelerate Playwright/TypeScript test automation development, improve test reliability, and streamline repetitive automation and maintenance tasks.
- Directed test orchestration across Azure DevOps Pipelines and GitHub Actions, implementing shift-left flaky test reduction that lowered release blockers by 25%.
- Defined risk-based test strategy and smoke test suites, documenting design standards and aligning execution with Agile sprint goals.
- Collaborated with engineering and product teams to map defects to ProofHub requirements, enhancing observability and accelerating delivery through clear communication.

SDET-I | *KnackLabs* — Apr 2024 - Mar 2026 | Hyderabad

- Led dual-track manual and Playwright/TypeScript automation, achieving 85% test coverage while documenting functional test cases and applying risk-based selection to cut regression effort by 35%.
- Validated REST and GraphQL APIs for high-volume, multi-tenant systems, executing functional and regression tests to ensure contract compliance and data integrity.
- Engineered reusable API fixtures and data-driven test generation, applying shift-left test design to reduce flakiness and validate Smart TV compatibility on Tizen and WebOS.
- Integrated Playwright suites into Azure DevOps and GitHub Actions for per-PR execution, publishing Allure/HTML reports for faster defect analysis, and created SQL data-setup scripts for consistent parallel test data.
- Mentored a 4-member QA team on JIRA-driven defect triage and prioritization, reducing average resolution time by 30% via clear communication.

Associate Quality Assurance Engineer | *KnackLabs* — Mar 2023 - Mar 2024 | Hyderabad

- Conducted manual, API (Postman), and performance testing (k6) within CI/CD pipelines to uncover bottlenecks across client platforms.
- Executed functional, regression, and exploratory testing across web and mobile applications, identifying and reporting critical defects with clear reproduction steps.
- Led QA for WatchOS and iOS applications, validating real-time features and workflows.
- Executed Salesforce integration testing (500+ SOQL queries), identifying 150+ critical defects during platform revalidation while maintaining 99.9% data integrity.

GIS Engineer | *RMSI Pvt Ltd* | *Tech Mahindra Ltd.* | *Cyient Ltd* — Jul 2018 - Mar 2023 | Hyderabad

- Built geospatial solutions for autonomous-vehicle mapping and navigation projects (Apple Maps, TomTom, Go-Hunt) using ArcGIS, QGIS, Cartopia, and FusionX — covering road networks, lane mapping, geo polygons, and live map triage across multi-country datasets (USA, Europe, Canada, Mexico).

PERSONAL PROJECTS

Custom Automation NPM Packages — *Open-source testing & TypeScript utility ecosystem*

- Architected a scalable NPM monorepo with framework-agnostic data generators (test-utils), strict TypeScript utilities (ts-utils), and a Playwright abstraction layer (playwright-base).
- Reduced test boilerplate by 10-15% and standardized data-driven testing architecture across engineering teams.

EDUCATION

- Albedo School of Technical Education — Graduate Program in Electronics & Engineering, Ernakulam, Kerala (2018-2021)
- Government Institute of Electronics — Diploma in Industrial Electronics, Secunderabad, Telangana (2013-2016)
