PERAKA DOLA NAGA SYAM KUMAR

SDET-II | Playwright | TypeScript | API & Performance Testing | CI/CD

+91-9014117617 | pdnsyamkumar@gmail.com | LinkedIn | Portfolio

SUMMARY

SDET with 3.7+ years building Playwright/TypeScript automation frameworks for web and API services (REST & GraphQL), with hands-on performance testing experience using k6 within CI/CD pipelines. Delivered a modular framework that cut regression cycle time by 40% and tripled execution speed through parallelization; achieved 85% test coverage while cutting defect resolution time by 30% via CI/CD-integrated API validation. Comfortable working directly with clients, developers, and QA teams in Agile/Scrum delivery.

SKILLS

Test Automation & Frameworks: Playwright, Test Automation Architecture, Page Object Model (POM), Data-Driven Testing, Test Orchestration, Parallel Execution, Flaky Test Reduction

API & Performance Testing: REST & GraphQL API Testing, API Contract Validation, Performance & Load Testing (k6), Functional Testing, Regression Testing, Manual Testing

Programming & Scripting: JavaScript, TypeScript, HTML, CSS, DOM, SQL, YAML, SOQL

DevOps & Tools: Azure DevOps Pipelines, GitHub Actions, Git, VS Code, Postman, CI/CD Integration, Allure Reporting, HTML Reports, Linux

QA Methodologies: Test Design & Execution, Requirement Traceability, Risk-Based Testing, Shift-Left Testing, Smoke Testing, Defect Triage, Agile/Scrum, STLC, SDLC

Test Management & AI Tools: JIRA, TestRail, ProofHub, ChatGPT, Claude, Codex, Cursor, Antigravity

WORK EXPERIENCE

KnackLabs **Mar 2023 – Present**

SDET-II | Client: Flipspaces | Apr 2026 – Present

- Built a modular Playwright/TypeScript automation framework with ProofHub-linked test cases, delivering parallel execution that cut regression cycle time by 40%.
- Directed test orchestration across Azure DevOps Pipelines and GitHub Actions, implementing shift-left flaky test reduction that automated regression suites and lowered release blockers by 25%.
- Defined risk-based test strategy and smoke test suites, documenting design standards and aligning execution with Agile sprint goals.
- Collaborated directly with engineering and product teams to map defects to requirements, improving observability and accelerating delivery through clear communication.

SDET-I | Clients: One Health Assist, Hoichoi TV, eGain, Celito Tech | May 2024 – Mar 2026

- Led dual-track manual and Playwright/TypeScript automation, achieving 85% test coverage while documenting functional test cases and applying risk-based selection to cut regression effort by 35%.
- Validated REST and GraphQL APIs for high-volume, multi-tenant systems, executing functional and regression API tests to ensure contract compliance and data integrity.
- Engineered reusable API fixtures and data-driven test generation, applying shift-left test design to reduce flakiness and validate Smart TV compatibility on Tizen and WebOS.
- Integrated Playwright suites into Azure DevOps and GitHub Actions for per-PR automated execution, publishing Allure/HTML reports for faster defect analysis, and created SQL data-setup scripts for consistent parallel test data.
- Mentored a 4-member QA team on JIRA-driven defect triage and prioritization, reducing average resolution time by 30% via clear communication.

Associate Quality Assurance Engineer | Clients: Calibrate, Ardelyx, TVS Motors, Betagged | Mar 2023 – Apr 2024

- Conducted manual, API (Postman), and performance testing using k6 within CI/CD pipelines to uncover bottlenecks across client platforms.
- Executed Salesforce integration testing (500+ SOQL queries) and identified 150+ critical defects during platform revalidation, maintaining 99.9% data integrity and stabilizing the live platform via risk-based testing documented in JIRA.

GIS Engineer | RMSI Pvt Ltd | Tech Mahindra | Cyient Ltd **Jul 2018 – Mar 2023**

Built geospatial solutions for autonomous-vehicle mapping projects (Apple Maps, TomTom, Go Hunt) using ArcGIS, QGIS, Cartopia, and FusionX.

Bio-Medical Service Engineer | Prime Agencies **Jan 2017 – May 2018**

Installed, calibrated, and maintained diagnostic medical equipment; conducted preventive maintenance and staff training.

PERSONAL PROJECTS

@pdnsyamkumar/playwright-base — Open-source Playwright utility library

- Engineered BaseTestData and a BaseApi abstraction layer, standardizing data-driven testing and API contract validation across suites.
- Cut boilerplate up to 50%, accelerating adoption of a modular, maintainable automation architecture across engineering teams.

EDUCATION

Albedo School of Education, Kerala — Graduate Program in Electronics & Engineering | 2018 – 2021

Government Institute of Electronics, Secunderabad — Diploma in Industrial Electronics | 2013 – 2016
