PERAKA DOLA NAGA SYAM KUMAR

SDET-II | QA Automation Engineer | Playwright | TypeScript | UI & API Automation | CI/CD

Hyderabad, Telangana, India | +91-9014117617 | pdnsyamkumar@gmail.com | LinkedIn | Portfolio | NPM

SUMMARY

SDET-II with 3.8+ years of relevant experience in manual and automation testing across Healthcare, OTT/Media, and Enterprise domains, working in Agile teams with developers, product owners, and QA. Builds and maintains Playwright/TypeScript UI and API automation frameworks (Page Object Model, reusable fixtures, parallel execution) integrated into Azure DevOps and GitHub Actions CI/CD. Experienced in AI-Assisted Testing using SKILL.md-based Agent Skills and Generative AI tools to accelerate test automation development, improve reliability, and reduce repetitive engineering effort. Cut regression cycle time by 40%, reached 85% test coverage, and reduced defect resolution time by 30%, with hands-on REST/GraphQL API and data-integrity testing for high-volume, multi-tenant systems.

SKILLS

Test Automation: Playwright, UI & API Automation Frameworks, Page Object Model (object-oriented design), Data-Driven Testing, Parallel Execution, Flaky Test Reduction, Test Automation Architecture

Languages: TypeScript, JavaScript, SQL, SOQL, HTML, CSS, DOM, YAML

API & Performance: REST, GraphQL, Postman, OpenAPI/Swagger, API Contract Validation, k6 (Performance & Load Testing)

CI/CD & DevOps: Azure DevOps Pipelines, GitHub Actions, Git, CI/CD Integration, Allure Reporting, Linux

Test Management & Process: Test Plans, Test Cases, Test Metrics, Bug Reporting, Defect Triage, Risk-Based Testing, Shift-Left Testing, Agile/Scrum, STLC/SDLC, JIRA, TestRail, ProofHub

Platforms: Web, iOS, WatchOS, Smart TV (Tizen, WebOS)

AI-Assisted Testing: SKILL.md-based Agent Skills, Claude, ChatGPT, Codex, Cursor, Antigravity

PROFESSIONAL EXPERIENCE

SDET-II | KnackLabs Apr 2026 - Present | Hyderabad

- Built and maintain a modular Playwright/TypeScript UI and API automation framework with ProofHub-linked test cases; parallel execution cut regression cycle time by 40%.
- Operate test orchestration across Azure DevOps Pipelines and GitHub Actions; shift-left flaky test reduction lowered release blockers by 25%.
- Defined risk-based test strategy and smoke suites, documenting test design standards and aligning execution with Agile sprint goals and release timelines.
- Partner with developers and product owners to map defects to ProofHub requirements, improving traceability and delivery speed.
- Use AI-assisted testing (SKILL.md Agent Skills, Generative AI tools) to speed up Playwright test development and cut repetitive maintenance work.

SDET-I | KnackLabs Apr 2024 - Mar 2026 | Hyderabad

- Led manual and Playwright/TypeScript automation to reach 85% test coverage; documented functional test cases and used risk-based selection to cut regression effort by 35%.
- Validated REST and GraphQL APIs for high-volume, multi-tenant systems with functional and regression tests, ensuring contract compliance and data integrity.
- Engineered reusable API fixtures and data-driven test generation; validated Smart TV compatibility on Tizen and WebOS.
- Integrated Playwright suites into Azure DevOps and GitHub Actions for per-PR execution, published Allure/HTML reports, and wrote SQL data-setup scripts for consistent parallel test data.
- Mentored a 4-member QA team on JIRA-driven defect triage and prioritization, reducing average resolution time by 30%.

Associate Quality Assurance Engineer | KnackLabs Mar 2023 - Mar 2024 | Hyderabad

- Ran manual, API (Postman), and performance (k6) testing within CI/CD pipelines to uncover bottlenecks across client platforms.
- Executed functional, regression, and exploratory testing on web and mobile apps; reported critical defects with clear reproduction steps. Led QA for WatchOS and iOS apps.
- Executed Salesforce integration testing (500+ SOQL queries), finding 150+ critical defects during platform revalidation while maintaining 99.9% data integrity.

GIS Engineer | RMSI Pvt Ltd | Tech Mahindra Ltd. | Cyient Ltd Jul 2018 - Mar 2023 | Hyderabad

- Built geospatial data solutions for autonomous-vehicle mapping (Apple Maps, TomTom, Go-Hunt) with ArcGIS and QGIS across USA, Europe, Canada, and Mexico datasets.

Bio-Medical Service Engineer | Prime Agencies Jan 2017 - May 2018

- Installed, calibrated, and maintained diagnostic medical equipment in healthcare facilities; conducted preventive maintenance and staff training.

PERSONAL PROJECTS

Custom Automation NPM Packages - open-source testing and TypeScript utility ecosystem

- Architected an NPM monorepo with framework-agnostic data generators (test-utils), strict TypeScript utilities (ts-utils), and a Playwright abstraction layer (playwright-base), reducing test boilerplate by 10-15% and standardizing data-driven testing.

EDUCATION

Graduate Program in Electronics & Engineering - Albedo School of Technical Education, Ernakulam, Kerala (2018-2021)

Diploma in Industrial Electronics - Government Institute of Electronics, Secunderabad, Telangana (2013-2016)
